Jonathan Lee Recruitment

Who we are

For over 40 years, Jonathan Lee Recruitment has been providing exceptional people and a premier service to the technology, engineering and manufacturing sectors globally.

Our specialist team of technical and industry professionals offer a consultative approach bringing an in-depth understanding of the skills, experience and personal attributes required for a variety of roles from entry-level graduate positions to executive and board-level appointments.

Our suite of services has evolved to address any resourcing challenge a client may face, covering permanent and contract recruitment, interim management, search & selection, managed services, talent management solutions and design services.

With over 85% repeat business annually, we build relationships for the long-term, committing to continuous improvement, working closely with industry partners and professional bodies to support our candidates, clients and the wider market.

"Jonathan Lee Recruitment was born over 40 years ago out of my personal passion for engineering and an understanding of the importance of a strong innovative manufacturing sector to the UK economy."

"We have strived to establish and maintain a supportive, teamworking culture where the customer comes first and where honesty, integrity, professionalism, knowledge and empathy lie at the heart of everything we do."

JONATHAN LEE - CHAIRMAN

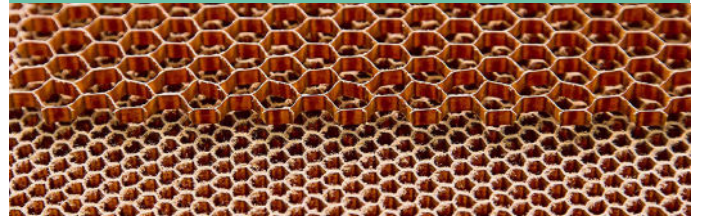

What we can do for you

We offer permanent, interim and contract recruitment services for the various sectors that make up the manufacturing & materials industry, including:

Additive Manufacturing

Composites

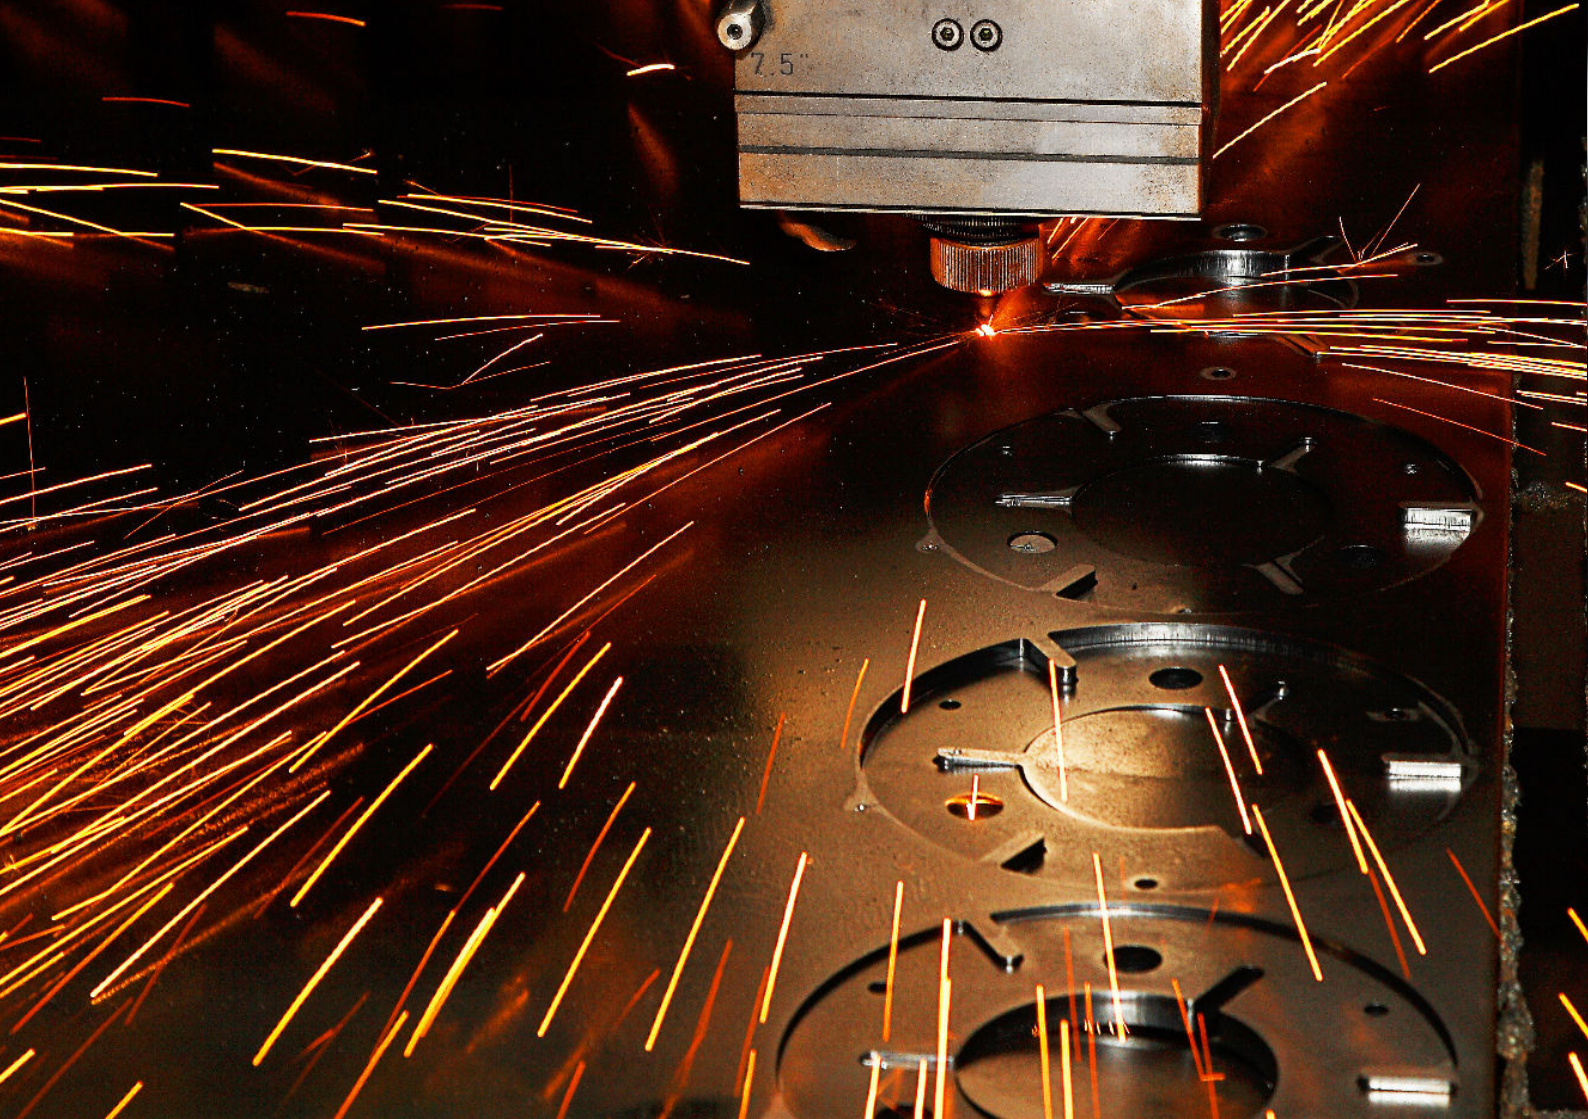

Metals

Plastics

Additive Manufacturing

More and more sectors are seeing the advantages of additive manufacturing (3D printing), higher capacity printers are being invested in, more personalised products are being developed, and research investment levels are rising.

The UK government has set out plans to be a world leader, with 8% market share in additive manufacturing by 2025 post Brexit. They propose to do this by coming together with industry and academic bodies to provide a place to access and share the latest research whilst using it to upskill workforces.

Healthcare is already seeing the benefits of additive manufacturing - bespoke prosthetic limbs and face masks have all been produced with great success through additive manufacturing.

Jonathan Lee Recruitment's composites division provides best-in-class contract and permanent recruitment services in: product development, manufacturing, engineering and commercial.

Our consultants are best placed to deliver the right candidates to the right clients due to their unique position of truly understanding the various industries and specialist role requirements.

For more information on our additive manufacturing recruitment services visit: www.jonlee.co.uk/additive-manufacturing

Composites

The composites industry continues to grow at a great pace. Major factors contributing to the growth include its use in the ever-expanding automotive, energy and aerospace industries.

Its long-service life and low maintenance makes it the perfect material to help with environmental issues, its lightweight properties are particularly useful in the transport and future mobility sector (a less weighty vehicle means less fuel is used on the roads), and its thermal properties are a great alternative for the production of electric vehicle battery boxes.

Jonathan Lee Recruitment's mission is to provide the best resourcing solutions through fully understanding, communicating and meeting the needs of our clients, candidates and colleagues.

Our consultants are specialists across the wide range of sectors that the composites industry touches, meaning they are ideally placed to understand client requirements and find, attract and retain the very best talent for our clients.

For more information on our composites recruitment services visit:

Metals

Jonathan Lee Recruitment's Metals division provides best-in-class contract and permanent recruitment services in three dedicated areas: product development, manufacturing and commercial, across industries that include:

Steel manufacturing, steel processing, steel stockholding, mixed metals, manufacturing, pressings, roll forming, extrusion, laser cutting, welding, castings, forgings, turned parts, precision engineering/machining, plating, metallurgy and inspection.

Working in partnership with our global client base, who range from prestigious global blue-chip clients through to SMEs, covering metal manufacturing, stockholding and distribution including steel, aluminium, copper and exotic metals, we identify and attract the best talent available. Our professionalism and

integrity mean that we take the time to listen to your requirements to find the perfect candidate for your specific role.

As many of our metal consultants are industry specialists from relevant engineering backgrounds, including automotive, aerospace, defence, electronics and manufacturing sectors, we pride ourselves on our in-depth understanding of the skills, experience and personal attributes required for specialist roles.

For more information on our metals recruitment services visit:

www.jonlee.co.uk/metals

Plastics

The plastics industry is in sharp focus at the moment. This focus has led to a 2021 ban on some single use plastics in the UK and abroad and a 2022 tax on plastic packaging. Despite this, the plastics industry remains as vibrant as ever.

The ban on some traditional plastics has led to an opportunity for the development and production of more environmentally friendly recycled plastics and bioplastics, whilst plastics have many positive properties (energy efficiency, durability and performance) means that they continue to play a huge role in being used in key areas, such as construction, automotive, and medicine.

The re-opening of events is also likely to increase the need for some single use plastics, whilst the shortages of plastics in key sectors during 2020 has led to

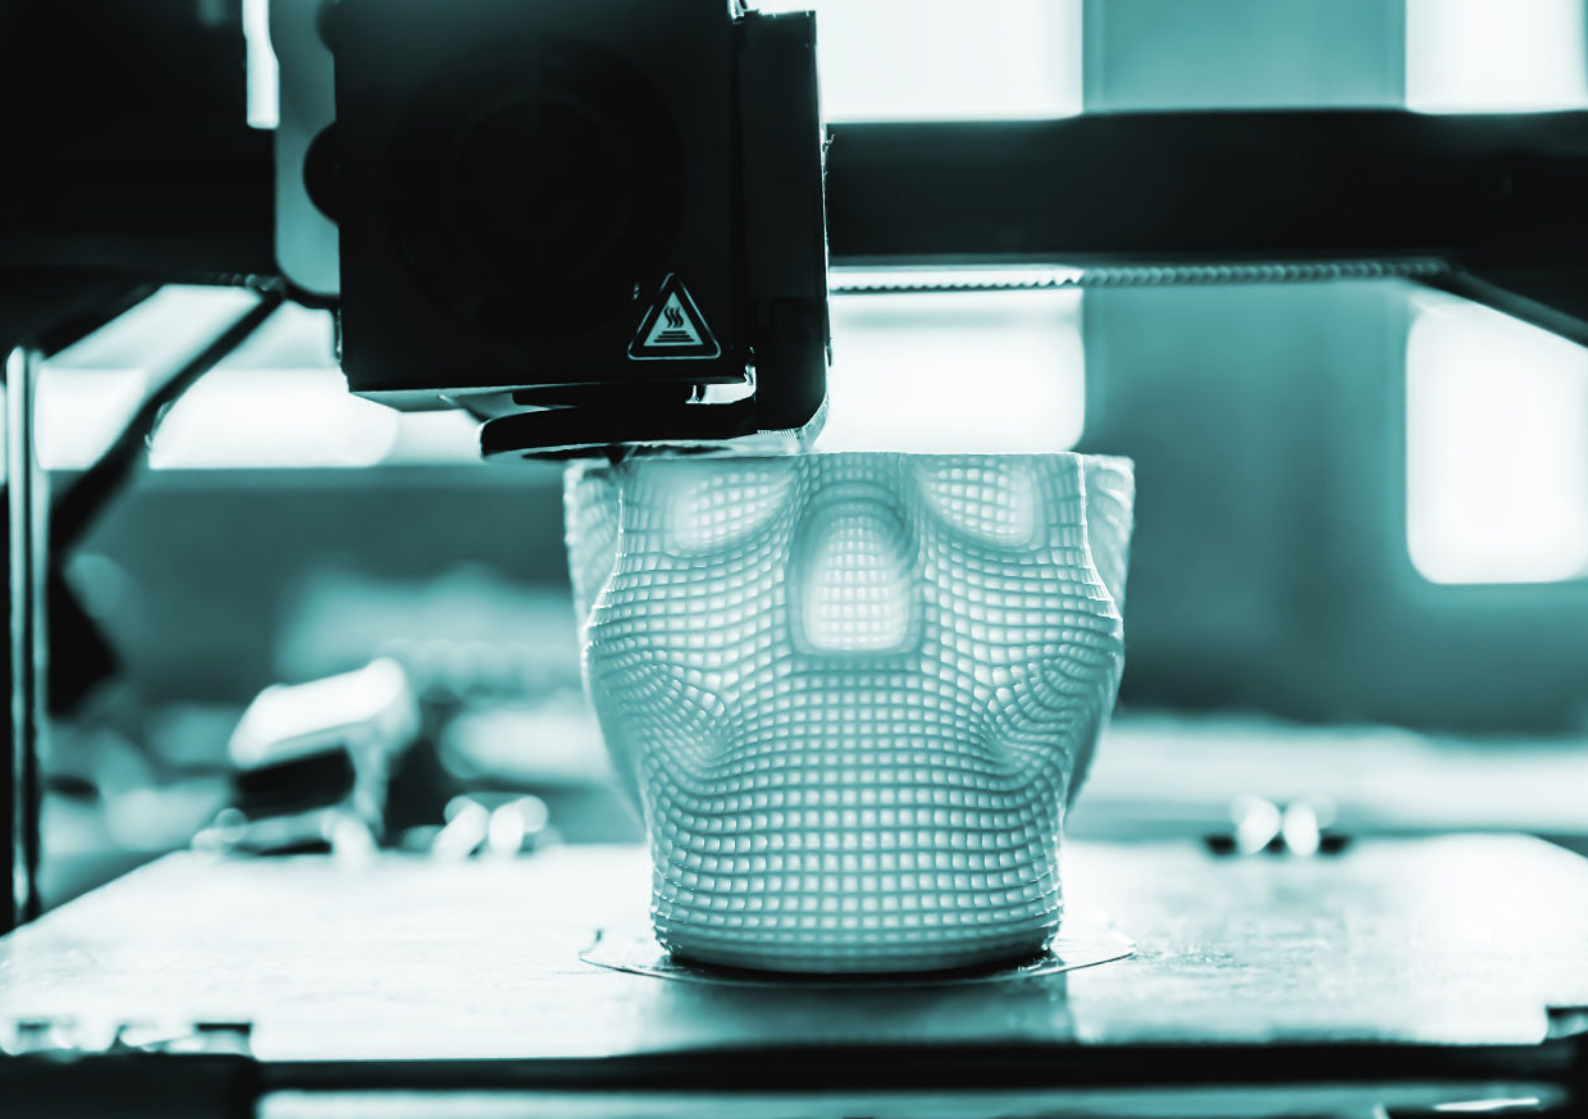

opportunities for an increase in plastics production within the UK.

All this means the need for plastic development, manufacturing and engineering is as strong, if not stronger, than ever.

Jonathan Lee Recruitment's expert plastics recruitment consultants work across the many industries that plastics touch, to ensure they provide the very best candidates for the many diverse plastics roles.

Our commitment to you

Jonathan Lee Recruitment is committed to delivering best-in-class recruitment and talent management services. Taking the time to understand your business needs and priorities, we adopt a partnership approach to help achieve your talent acquisition plans.

We present only the most relevant candidates, taking into account the softer issues of recruitment; providing skills, personality and cultural fit. You will benefit from the latest initiatives in recruitment, digital media and candidate attraction.

Whether you are seeking to recruit one key individual or an entire team, our expert consultants, administrators and welfare support resource provide a dedicated, personalised and premier service.

Additional services

INTERIMS

jonlee.co.uk/interims

Delivering high calibre interims in the engineering, manufacturing and technical sectors to meet a wide range of business challenges

DESIGN SERVICES

jonlee.co.uk/design-services

Providing our clients with digital design services, prototyping solutions and full management of turnkey projects

SEARCH & SELECTION

jonlee.co.uk/search-selection

Conducting exclusive and retained search assignments in the industrial and technical sectors to deliver executive, director and board-level appointments

MANAGED SERVICES

jonlee.co.uk/managed-services

Providing flexible service-level agreements and bespoke processes, tailored to your business needs
